SUMMARY

Full Stack Developer focused on web applications, SaaS products, automation, and AI integrations. I build responsive interfaces, APIs, authentication flows, administrative modules, payment integrations, and database-driven systems, mainly using TypeScript, Next.js, React, Node.js, and Python. I have experience building digital products from concept to implementation, with attention to usability, scalability, technical organization, and business value. I am looking for an opportunity to work with technology teams where I can contribute to product development, continuous improvement, and delivery of real solutions.

EDUCATION

**POSTGRADUATE DEGREE IN AI FOR DEV'S
TECHNOLOGIST DEGREE IN FULL STACK DEVELOPMENT**

FIAP | In progress
Universidade Estácio de Sá | 2023 - 2025

Certifications:

- Amazon Cloud Services AWS Training (KaSolutions);
- Endpoint Security (Cisco Networking Academy);
- Pre-MBA in AI for Business (EXAME / Saint Paul);
- Python Journey (Hashtag Treinamentos).

PROFESSIONAL EXPERIENCE

FREELANCE / SELF-EMPLOYED FULL STACK DEVELOPER

2024 - Present

- Independent work on web projects, prototypes, integrations, and automation for digital applications.
- Development of responsive interfaces, APIs, and database integration routines.
- Use of Git/GitHub, web deployment workflows, and scoped delivery organization.
- Creation of proprietary solutions and practical projects focused on SaaS, AI, and administrative dashboards.

APP DRIVER / SELF-EMPLOYED PROFESSIONAL

2021 - Present

RODOVIÁRIO CAMILO DOS SANTOS - Operations Supervisor
SOCIEDADE EUNICE WEAVER DE JUIZ DE FORA - Administrative Assistant

2019 - 2021
2015 - 2019

PRACTICAL PROJECTS

MARGEM APP - Next.js, React, TypeScript, Prisma, Supabase, PostgreSQL, Tailwind CSS, OpenAI API, AbacatePay

Web platform for ingredient management, technical recipe sheets, recipe pricing, and nutrition labeling for food businesses.

- Structured flows for ingredients, recipes, pricing, billing, and nutrition modules
- Implemented snapshots, printing, and data organization focused on user operations
- Architecture prepared for a SaaS model with multi-workspace, plan entitlements, and internal catalog
- AI automation integration and preparation for multiple external providers
- Product-driven development focused on operational clarity and solution scalability

RIVALS AI - Next.js, React, TypeScript, Tailwind CSS, Supabase, AbacatePay, AI APIs

Entertainment social network for creating, publishing, and discovering AI-generated debates.

- Developed the debate arena with presets, custom characters, streaming, and final verdict
- Implemented manual feed publishing, profiles, social interactions, and notifications
- Built the social layer with comments, reposts, saves, follows, and initial moderation
- Integrated authentication, billing, token control, health checks, and admin panel
- Project focused on digital product experience, user experience, and scalable architecture

COMERC IAS - TypeScript, React, Bootstrap, Node.js, Supabase

Institutional website with an administrative area and metrics tracking.

- Developed the responsive front-end and commercial pages
- Structured editable content and authentication for the internal area
- Implemented analytics for visits, clicks, and time spent

GLACÊ CONFEITARIA - Next.js, React, Gemini API, MongoDB

Product catalog with WhatsApp checkout and an internal dashboard with an AI assistant.

- Developed an app for inventory, cash register, menu, and order control
- Implemented an AI-assisted dashboard for task generation, inconsistency analysis, and operational insights

KNOWLEDGE AND SKILLS

- Front-end: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, UI libraries
- Back-end & Data: Node.js, Python, REST APIs, JWT, OAuth, MySQL, PostgreSQL, MongoDB, Prisma, Supabase
- Infrastructure & Tools: Git, GitHub, Docker, AWS, Vercel, CI/CD, Scrum, AI tools, LLMs, and Codex
